

# THE ONCIDIUM FOUNDATION

## Thank You!

In 2022, thanks to your generosity, the Oncidium foundation was able to support a dozen of projects, all around the world.

On behalf of those we support, we would like to sincerely thank you for your contribution and commitment over the year 2022. Together, we were able to work and put all our efforts at the heart of the fight against cancer!

### RADIOTHERANOSTICS: A NEW PLAYER IN THE FIGHT AGAINST CANCER

#### WHAT ARE RADIOTHERANOSTICS?

They represent an **innovative technique in cancer care**, using **radioactive substances to either do diagnostic or therapy**, both targeting the same "protein", which is a target expressed by cancer cells.

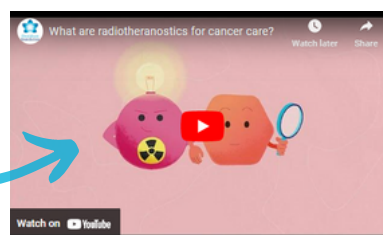

With the **diagnostics tool**, we are able to **detect** the protein on the cancer cells (through imaging)

With the **therapeutic tool**, we are able to **destroy** these same cancer cells that express this protein (through an injection)

This technique is part of **personalized medicine**, as it can predict if one is more likely to respond to this therapy or not and anticipate results. Moreover, it allows to deliver **precise and targeted therapy** to cancer cells, and thus **limiting damage to healthy tissues**.

The Oncidium foundation's goal is to **support and accelerate the development** of this innovative technique, in view of **enhancing access** for people living with cancer, **regardless of origin, technology availability or financial situation**.

To learn more about how radiotheranostics work, watch our illustrated videos on our [Youtube Channel](#)

## SUPPORTING DEVELOPMENT TO INCREASE ACCESS TO THE GREATEST NUMBER

Funding scientific research remains the best way to increase the chances of finding a cure and improve the quality of life of people living with cancer. Today, **the recent approvals of new radiotheranostics agents** such as 177-Lutetium-PSMA-617 (for metastatic castration-resistant prostate cancer (mCRPC)), have **encouraged more research** and testing of several other novel radiotheranostics, but also **demonstrated the therapy efficacy**, and resulting in improved **patient outcomes**.

Although we are thrilled to witness these life-saving developments, **there is still a lot to be done**. Indeed, despite an increase in the chances of cure thanks to the progress made in research, today the number of cancer cases continues to grow and the death rates remain significant.

## EDUCATION AND AWARENESS ARE THE KEY

The concept of radiotheranostics is generating a lot of interest, namely as it shifts from an approach where every patient is treated in the same way, to a **more personalized and systemic method**, adapted on a **case-by-case basis**. However, there remains an important lack of knowledge about the existence and potential of this technique and several apprehensions about nuclear medicine in general.

This is why the Oncidium foundation endeavors to **deliver educational content**, in order to **improve the general knowledge** and provide answers to common misconceptions and concerns.

## WORKING BEYOND BORDERS

The Oncidium foundation can count on professionals and experts recognized throughout the world. For instance, the foundation is **surrounded by a global network of 40 Ambassadors** (and counting), present in **22 countries**, that all work on a common goal: access and availability to radiotheranostics, on a local and international level. The foundation also benefits from the guidance of its **Advisory Board**, composed of recognized experts who analyze and advise on projects and directions.

## How To Get Involved?

### SUPPORT BY MAKING A DONATION

The generosity of donors allows the Oncidium foundation to finance the research and development of new radiotheranostics for cancer care as well as to support people living with cancer. Please know that your gift makes a meaningful difference and provides help and hope to people who come to us for support.

- [Friends of the Oncidium foundation Fund](#): Support the Oncidium foundation's programs and collaborative projects intended to advance the availability and access to radiotheranostics, worldwide.
- [NOBLE – Nobody Left Behind](#): Enable patients with prostate cancer, regardless of origin, technology availability or financial situation, to access PSMA-SPECT imaging for accurate diagnosis and treatment planning.
- [The Cary M. Adams Fund](#): Continue Cary's commitment to enhance cancer patients' access, awareness, and the development of new radiotheranostics in the US.

Through these Funds, you could benefit from tax deductions. Please contact us to check if your country is eligible for KBF tax benefits.

### PROVIDE YOUR EXPERTISE

Are you:

- [an expert](#) in the field of radiotheranostics or nuclear medicine in general and wish to share your knowledge about matters regarding radiotherapeutics developments or promote your contributions through the Oncidium foundation?
- [a patient advocate](#) committed to spread the word on life-saving solutions?
- [a cancer survivor](#) treated with radiotherapeutics and wish to share your story?

Your help is valuable and appreciated. If you wish to give back, you are in the right place, contact us today!

For any questions, recommendations, ideas or projects, please do not hesitate to contact us, we would be happy to connect with you!

## Wish To Renew Your Pledge?

**Pledge information:** By completing this document, you hereby mark your interest to support the Oncidium foundation and pledge to donate the following amount:

.....EUR/USD (please strike-through non-chosen currency)

The donations will be used for Oncidium foundation activities and projects. Contributions will solely be in form of debit/credit card payments.

The Oncidium foundation team will send you an email with a link to complete your donation\*. Please complete the information in print:

**First Name\***

**Last Name\***

.....

.....

**Email\***

.....

*\*The information provided will be used to contact you to finalize your contribution to the Oncidium foundation. By providing your information, you hereby authorize the Oncidium foundation to contact you regarding matters related to the Oncidium foundation's projects and activities.*
